THE FIRST AND ORIGINAL

Est. 1913

ED BY LIFE. EVOLVING WITH THE TIMES

FORMICA®

The first and original.
Inspired by life.
Evolving with the times.

The first and original
Formica Group invented high pressure laminates in 1913. Pioneers by definition, our iconic Formica® brand represents the quintessence of laminates.

Inspired by life
Laminates entered people's daily lives and made modernity dreams come true and accessible. Similarly, the demand for multifunctional, practical and durable designed surfaces is a constant inspiration for our Formica® Collections. At rest, at leisure, at work.

Evolving with the times
The way people live, work and play continuously changes. Formica Group keep pace with these evolving times through constant innovation, reflecting global trends and responding to ever changing needs and habits.
The true original, still surfacing the world.

Product grades, finishes and accreditations.

This Collection incorporates the following grades of decorative laminate each with its own performance characteristics.
These grades conform to EN438.

Formica® Laminate
Sheets (thin) consisting of layers of wood-based fibers impregnated with thermosetting resins and a surface décor on one side

Grade: **HPL/EN 438-3 HGP:** Horizontal, General Purpose, Postforming high pressure decorative laminate
HPL/EN 438-3 HGS: Horizontal, General Purpose, Standard high pressure decorative laminate
Thickness: 0.7 mm (nominal), single sided

Additional flame retardant grades are available on request (please check for available options)

Formica® Compact

Sheets (thick) consisting of layers of wood-based fibers impregnated with thermosetting resins and surface décor on one or both sides

Grade: **HPL/EN 438-4 CGS:** Compact, General Purpose, Standard high pressure decorative laminate
Thickness: Single sided 2, 2.5, 3 mm / Double sided 4, 6, 8, 10, 12, 13, 16, 18, 20 mm

Additional flame retardant grades are available on request (please check for available options)

Available surface finishes and recommended applications

| | | | Recommended applications | |

General

The information given in this brochure is correct at the time of publication. However, as we have a policy of constant product development and improvement, product specifications may change in the future. Visit formica.com, or formica.info for technical data, as the most up-to-date source of information.. Not all certifications stated are applicable or available for all Formica® products. Please check that the product you require is covered by a relevant certification or is suitable for your specific application, in advance of order placement.

Light Reflectance Value

Light Reflectance Value (LRV) is a value indicating the proportion of light reflected by a colour, when measured under standard daylight conditions. This guidance uses a scale of 0-100, where 0 = black and therefore total light absorption, whereas white = 100 and therefore total light reflection. The main purpose of this value is to indicate measured colour contrast between two surfaces, which need to be readily distinguishable within an environment (under static conditions, a difference of 30 units between two colours is considered adequate). LRVs stated may or may not be exact and are provided for guidance only.

Please note

For non-solid colour decors, where there are multiple colours across the design, the stated LRV is an average value taken from multiple measurements across the décor and must be used with caution.
The individual colours in a pattern, woodgrain or stone design can differ more than 30 LRV units within the design itself.
